Chinook, Alberta. Thursday, July 1st 1943

Potato Beetles Latest Pest In Alberta

Edmonton, June 21 (CP) — Alberta farmers faced another worry today—the potato beetle. Officials of the provincial government department of agriculture urged town and city growers to declare war on the beetles at once, and, if necessary, pick the bugs off by hand.

Warning that the situation is serious, they said that immediate steps should be taken to combat the menace. J. E. Eaglesham, supervisor of pest control for the department of agriculture said a late potato crop, coupled with the early appearance of the beetles in large numbers, called for prompt action.

Too, the supply of insecticides, required by those with large crops of potatoes, is limited, and small growers could aid in conserving the supply by picking the beetles off their own plants.

Alberta Farm Workers Cannot Leave Province

Edmonton, June 22nd (CP) — No farm workers are being permitted to leave Alberta for job elsewhere because of the critical farm labor shortage in this provincial department of agriculture said Monday. Officials of the national selective service said no permits are being issued to men to take farm jobs in any other province.

TIME BOMBS—

Familiarity, it seems, breeds blindness if it doesn't breed contempt.

Education is to prepare people to live — not just to make a living.

Devotion to a task is a better measure of success than dollars.

The great man is intent upon his work; the little man upon his reputation.

If the church is to become a museum where old Christians are stored it must be a production line where new Christians are made.

They are also absentee who are only absent minded.

Some people tell you high ideals are unobtainable, as their excuse for putting up with low ones.

OBITUARY

A pioneer resident of Chinook for the past 33 years, Mrs. Sarah Ellen Berry, wife of Mr. H. F. Berry, died in the Calgary hospital, Wednesday, June 23rd, 1943, in her 85th year.

Born in Illinois, U. S., she moved with her husband and family to Alberta, when they took a homestead south of Chinook in 1910 where she resided until 16 years ago when they moved to town, where she resided up to the time of her death.

Surviving are her husband, one daughter, Mrs. R. D. Vanhook of Lacombe, two sons Parley of Wyoming, U.S. and Lawrence of Chinook. Two sons Lester and Jake predeceased her.

Funeral services were conducted in Chinook United church, Friday at 2:30 o'clock with Rev. Mr. French of Youngstown, officiating.

Burial in Chinook Cemetery

Pallbearers were: A. Marr; J. Robinson; Ray Robinson; Ethan Hage; A. Mayfield and L. Robinson.

Card Of Thanks

We wish to express our appreciation to our many friends and neighbors who in any way assisted during our recent bereavement. We also wish to thank all those who contributed to the beautiful floral tributes.

H. F. Berry and Family

TWO-THIRDS of the total number of loans outstanding in Canada's Chartered Banks average less than \$500 per loan.

Through bank loans, Canada's Chartered Banks help Canadians to benefit themselves, their fellows and their country. Many of these loans are small—but all contribute their share to the day-by-day activities of Canadian enterprise.

Some further facts about Canada's Banks:

Chartered Banks' loans related to agriculture as shown on the last official return to Parliament, totalled \$340,118,473. This sum included loans to farmers, ranchers, fruit raisers and to grain dealers and grain exporters.

Every general manager today heading a Chartered Bank entered the bank as a junior in some small branch.

Up to and including February, 1943, no fewer than 6803 men and 154 women bank employees had enlisted in the armed forces.

Canadians in every walk of life and in every part of Canada are served by more than three thousand branches and sub-agencies maintained by the Chartered Banks to facilitate the nation's business.

North-West Area Elevators Association

Pests—and a Reminder

Practically every plant, wild or cultivated, is subject to fungus and insect attack. 100% health is as rare in plants as it is in men.

When introducing new crops, we usually have a good idea of the diseases and insects which may cause trouble, but we cannot forecast the severity of attacks. Furthermore, control measures practised elsewhere may not be practicable or effective in our own region.

This year, we are concentrating a good deal of attention on oil crops: notably flax, sunflowers, Argentine rape and sorghums. The Dominion Plant Pathology Laboratory at Brandon is anxious to secure all possible information on insects found on the above crops. Growers of these crops are urged to be on the lookout, especially for flea beetles (on rape) and the sunflower moth. Please send specimens and report infestations to Dr. Bird at the Brandon Laboratory.

Send diseased specimens to the Dominion Laboratory of Plant Pathology at Edmonton, Saskatoon or Winnipeg.

Cut Sawfly Traps

Dr. C. W. Farstad has prepared the following paragraph and asked us to give it all possible publicity:

"Quite a number of farmers throughout the west have made a start toward a systematic plan for controlling wheat stem sawfly by planting traps. After having established a trap, and the sawflies have laid their eggs, the next step is to complete the destruction of the grubs in the stem. This can be accomplished by cutting the trap with a mower about July 10th, or simply by cutting it with the binder and cultivating the stubble immediately afterward."

A DELIGHTFUL DESSERT MAKES THE MENU PERFECT

Canada's Householders know that custards and blancmanges, quickly and easily made with pure, high quality Canada Corn Starch, are a delight with any luncheon or dinner menu.

At this time when Canadians are urged to "Eat Right to Feed Right", these delicious desserts will prove a welcome addition to the nutrition foods featured by the National Food for Fitness Campaign. Follow Canada's Food Rules for Health and Fitness.

CANADA CORN STARCH

Canada's Growing Navy

THERE HAS BEEN wide spread interest in the addition to the Canadian Navy of four escort destroyers, a gift of the United Kingdom. Our navy has undertaken to protect the western half of the North Atlantic convoy routes, and these ships will be of great assistance in carrying out this task. They will be appreciated by Canadians not only for their very great usefulness at this time, but also as a further sign of Britain's desire to support the Dominions in all possible ways. It is also an acknowledgment of the confidence of the British government that the officers and ratings of the Canadian Navy will use these ships effectively in the war against the powerful U-boat menace. Named after four Canadian rivers: the Saskatchewan, the Kootenay, the Ottawa and the Gatheneau, there is no doubt but that these ships will give valiant service in protecting supplies and war materials bound for Britain.

Canadian Navy Is Expanding

The growth of Canada's naval power since the beginning of the war has been amazing, and it represents an achievement of which we may be very proud. At the beginning of the war, Canada's total naval personnel was 1,700, which is less than the number of men required for one battleship. Today, there are 60,000 men in the navy, and Naval Minister Macdonald recently announced that by next year this number would be increased to 90,000, which will make it equal, on the basis of manpower, to the pre-war strength of the Royal Navy. The number of ships has also increased rapidly, and at present the Canadian Navy has over five hundred fighting craft, including destroyers, corvettes, submarine chasers, mine sweepers and other vessels. It is believed that two more British destroyers may be added to the four which have already been given to us, and it is also believed that Canada will shortly build several aircraft carriers.

On Guard In The Atlantic

In guarding the western half of the North Atlantic convoy routes the Canadian Navy has assumed a difficult task and one which requires the best of both ships and men. Many Canadian sailors are from the Prairies, and few have had previous naval experience, yet they have proven themselves capable of carrying out this important part in the Battle of the Atlantic, and great credit is due to them, as well as to the workers who have produced the ships which they man. It is clear that Canada now occupies a place of importance as a naval power and that it is playing a small part in the hastening of an Allied victory. It is expected that there will be little reduction in the strength of the navies of the Allied Nations in the years following the war, and we may look forward with interest to the future of the Canadian Navy.

HEALTH LEAGUE OF CANADA

THE MINERALS IN OUR DIET

We hear a great deal about vitamins in our diets these days but we must not forget the mineral content of our food. The minerals are important in the proper formation of our bones, teeth and body tissues. When we have an insufficient amount of minerals these parts of the body are weakened or diseased. Calcium is necessary for blood clotting and for strong bones and teeth. Phosphorus is responsible for a healthy nervous system. Iron is necessary for the formation of the red blood pigment and it protects us against nutritional anemia. Copper aids in the utilization of iron.

Milk is our richest source of calcium and we should include three glasses of it in our daily diet. Cheese has a higher percentage of calcium than milk as it is a more concentrated food, so if we could add a small amount of cheese to our daily menus it would be to our advantage; cheese is an excellent meat substitute. Other foods we should eat for their calcium content are beets, turnips, cauliflower, carrots, celery, asparagus, and beans. When we take milk for calcium we will also get a fair amount of phosphorus. Lean meats, fish, eggs, cheese, nuts and whole wheat cereals contain appreciable amounts of phosphorus.

Liver, pork or beef is an excellent source of iron so we should be on the lookout for new appetizing recipes for cooking it. Other organ meats such as heart, kidney, sweet breads are also high in iron. Dried peas and beans, eggs and molasses are good sources of iron. We will get sufficient copper from many common foods. The lack of iodine causes goitre which is found in the inland provinces. Nowadays it is possible to buy table salt which has iodine added to it so we should use iodized salt all the time especially when we have little or no salt water foods.

We should bake and steam vegetables not only for the vitamin preservation but also for the mineral content. Because a certain amount of the latter is lost in the cooking water we should cook vegetables in as little boiling water as possible and for as short a time as possible. Never throw the water away! You can use it for making cream soups, gravies, and sauces. You should boil leafy vegetables about 5-10 minutes, root vegetables such as turnips, parsnips, carrots 20-30 minutes, beets as much as 45 minutes depending on the size.

A post card request to the Western Division Health League of Canada, 111 Avenue Road, Toronto, will bring you a free copy of its authoritative vitamin chart.

A FAMILY AFFAIR

A freight train pulled out of the yards at McAlester, Okla., with this crew: V. A. Drumb, engineer; V. A. Drumb, Jr., fireman; R. L. Drumb, conductor; and twins, Leo and Elmo Drumb, brakemen. The engineer was the father of the fireman, the brother of the conductor and the uncle of the brakemen.

VILLAGES DESTROYED

Since the start of the war 356 Polish villages have been completely wiped out, the ground ploughed up and all inhabitants killed, according to information received by Victor Podolski, Polish minister to Canada, and made public by him.

Protein For Poultry

Is Going To Present Problem For Raisers This Year

Never before have producers been obliged to worry as to just where they would get this or that ingredient in order to blend suitable live stock or poultry rations. Proteins and carbohydrates and minerals and vitamins have all been discussed in an academic or detached manner. Millers and feed manufacturers have pretty well taken care of the situation, but the protein shortage is now so acute that poultry raisers will have to settle down and to a very large extent, solve the problem themselves.

It is not a simple problem to solve. Animal and vegetable proteins are both required, and how to get these in sufficient volume to develop and maintain in production the unprecedented hatch of chicks this year is something that calls for keen intelligence and outstanding farm management.—Farmer's Advocate.

SMILE AWHILE

Distracted Mother (to policeman)—Oh, officer, I've lost my little girl.

Policeman—What is she like? Distracted Mother—Well, she has her father's nose, but otherwise she's the image of me when I was a child.

Captain Jevons (introducing an acquaintance to his old aunt: "This is my old friend Jones. He lives on the Canary Islands."

"How interesting," murmured old aunt, and gathering all her wits, she added: "Then, of course, you sing."

Husband (irritably)—That's the second time you've asked what trumps are, dear.

Wife (sweetly)—Well, you want me to show a little interest in the game, don't you, dear?

"Stand up, soldier."

"I am, sir," said the uniform that makes you think I'm sitting down."

Two men, both noted for their caution when it came to money, met on the street.

"Well, well," said one, "fancy running into you like this. I was just looking for some one to lend me \$10."

"Is that so," replied the other. "Well, it's a nice day for it."

Dinner—Walter, please take this chicken away. It is actually so tough it seems to be made out of stone.

Walter—Nothing strange about that, sir. It's a Plymouth Rock.

Servant—"The doctor is here to see you, sir."

Absent-Minded Professor (in bed): "Tell him I can't see him. I'm ill."

"You've heard about the two Scots who drowned in Loch Lomond?"

"No."

"Very sad. Each bet sixpence he could stay under water longer than the other!"

"Well, I'll be going now. Don't trouble to see me to the door."

"No trouble at all. It's a pleasure."

"And what is the child's name?" asked the minister.

"Shirley," replied the father.

"Shirley?"

"Yes, sir, after the famous Shirley Temple."

"Yes, yes, of course," said the minister. "Let's see, who's the preacher there now?"

She poetically: "I'm that sunset glorious, Harold. The bars of red and gold are nature's own efforts in picture-making. What—"

He: "Yes, dear, it puts me in mind of something, too. I can't think whether it's streaky bacon or a plate of sliced tomatoes."

Recruit: "The sergeant is always plucking holes in me."

Corporal: "Well, you came here to be drilled, didn't you?"

Johnnie was visiting his uncle's farm. Among the animals was a young colt. The boy gazed at him long and earnestly.

"What do you think of him?" the uncle inquired.

"Why—he's all right, I guess," answered Johnnie, "but where's his rockers?"

ALASKA WAS GOOD BUY

The Alaska salmon industry will produce this year, it is estimated, about 10,000,000 cases of packed salmon with a valuation more than seven times the amount paid Russia for Alaska in 1867.

H. D. P. McLaughlin, Dauphin, Man.

HAS SIXTH SENSE
"In her four centuries as a world power, Britain has developed and perfected a sixth sense of international policy," says the Portuguese paper Novidades, of Lisbon. It said the "sixth sense" enabled Britain to "foresee instinctively and intuitively the evolution of events."

For 13 years, the annual increase in Russia's population has been 2,000,000. Total population is now estimated at 170,000,000.

A powerful Australian wind, which often attains a speed of 120 miles per hour, is called the Willy-Willy.

Recipe Of The Week

ALL-BRAN MEAT ROULP

1 cup All-Bran 1 teaspoon baking powder
1 cup buttermilk 1/2 teaspoon soda
1 1/2 cups flour 1 teaspoon salt

3 cups ground cooked meat 1/2 cup shortening
1 teaspoon salt

Soak All-Bran in buttermilk. Sift flour, baking powder, soda and salt together. Cut in shortening until mixture is like coarse corn meal. Add soaked All-Bran; stir until dough follows fork around bowl. Turn onto floured board; knead lightly; roll or pat into rectangle 1/4 inch thick.

Combine meat, catsup and salt; spread in thick layer over dough. Roll like jelly roll; place in baking pan and bake in moderately hot oven (425 degrees F.) about 30 minutes. Serve with Green Pea Sauce, if desired.

Yield: 10 servings.

GREEN PEAS SAUCE

2 tablespoons butter 2 tablespoons minced pimiento
2 tablespoons flour 1/2 cup cooked peas
1 cup milk 1/2 teaspoon salt

Make white sauce using butter, flour and milk. Add pimiento, peas and seasonings.

Aircrew Training

Men From Various Parts Of The World Make Up The Student Body

A navigator who saw action against the Japs in the Aleutians, three soldiers who returned to Canada for aircrew training, two air force sergeants and an airframe mechanic, all repatriated to Canada for pilot training. Englishmen, Welshmen, Scotsmen, an American and one Irishman from Elre, make up an unusual class of student pilots at No. 16 Elementary Flying Training School, Virton, Man. It is a significant picture of just what the British Commonwealth Air Training Plan means.

Hailing from Arborg, Man., Flying Officer Len Shebeski, who has re-mustered from a navigator to a pilot, spent a year in Alaska on bombing missions against the Japs in the Aleutians. "The men of my squadron were flying and working under adverse conditions but morale was very high," observed Flying Officer Shebeski when interviewed. "In a year of close contact with squadron members, I never heard an angry word spoken between the men." Shebeski lived on a farm with his parents for 23 years, taking a prominent part in activities in the Arborg district. An enthusiastic agriculturist and graduate of the University of Manitoba, he won the Canada Maltin Cup at the Provincial Seed Show in 1936 and the Ian McPhail Trophy (Junior Seed Growers), 1937. At the University of Manitoba he won the Lieutenant-Governor's Gold Medal in 1941. A sister, Rose Shebeski, serves in the Canadian Women's Army Corps.

Sgt. Derek Horne, 1527 Olive Dr., Virton, B.C., in the Canadian Army since the outbreak of war came back to Canada for pilots' training. Likewise, LAC J. V. Grot, Hanna, Alberta, traded the army khaki for air force blue and was repatriated to Canada. Two years overseas with the Canadian Army, then back to Canada for pilot training is LAC J. A. Stille's service career to date. He lives in New Westminster, B.C.

Two air force wireless operators, Sgt. J. R. Smiley, Oxidit, Ont., and Sgt. J. E. Taylor, Athabasca, Alta., got their chance to fly when the mustered overseas and recently returned to Canada.

Up to now LAC George Goodwin, Vancouver, B.C., turned his talents to keeping aircraft in fighting trim while overseas; his ambition now is to fly 'em.

The Best Time

Good Reason Why Farmers Should Do Haying In Afternoon

To the old adage, "Make Hay While the Sun Shines," modern science has added the indication farmers should do their haying in the afternoon.

Preliminary studies at New York State Agriculture college, reported by Prof. Otto F. Curtis, show the food content of alfalfa and other hay and forage crops is influenced by the time of day at which they are cut.

The reason, he explained, is that all carbohydrates are manufactured by plants from carbon-dioxide and water only in the presence of light, and "it stands to reason, as the tests have shown, that the plant tissues contain the most food for a full day of sunshine."

Recipe Of The Week

ALL-BRAN MEAT ROULP

Are Now Fit

Re-Examined For Military Service

Included in those re-examined and found fit were 5,875 men previously found fit but re-examined because of doubt of their medical category.

Those subsequently found fit were called for service, except for those granted postponements.

HOME SERVICE

TENNIS IS A GOOD GAME AND FINE EXERCISE

Now at last the summer season is here and the opportunity for playing outdoor games. Tennis is fun and most exhilarating. The exercise is good for you and your keenness of spirit will develop.

Tennis is a game for all ages, unless of course, your doctor has advised against exercise. Young and old find it thrilling and stimulating competition packed with enjoyment for all.

Exercise in the open air combined with fun—that is tennis! Could anything be more healthful or desirable? And anyone with perseverance and enthusiasm for the game can learn to play.

It is quite true that to become a tennis champion requires speed and a high degree of endurance. But not all want to become champions. The majority prefer to play the game for the game's sake, making it as mild or as strenuous as we choose.

Our 32-page booklet is extremely helpful not only for the beginner but also for the experienced. It gives all sorts of pointers and is written by a well-known authority of the game.

Send 15c in coins for your copy of "Develop Correct Tennis Form" to Home Service Dept., Winnipeg News-paper Union, 175 McDermott Ave. E., Winnipeg, Man. Be sure to write plainly your name, address, and the name of booklet.

Samuel Colt, inventor of the revolver, made a wooden model in 1829.

TWO BOOKS IN ONE BY ANN ADAM

Lunch box ideas and food saver technique, compiled by Ann Adam, with foreword by Dr. L. B. Pett. It's the Approved.

PATTERN FOR DISASTER

BY J. B. RYAN

CHAPTER IX.

THE black hulks of ships at the docks were sighted before the fugitives drew up before a barn-like structure. "We shall be safe in here," Pancho said, as he fumbled with a warped door, twisting a padlock in his gnarled hands until the staple came out of the lock. "It is the day to unload the wool that is stored inside and I know that the stuff is not to be moved for several weeks. A pungent, lathery odor was in Morgan's nostrils as he entered the unlighted building. His hand touched an immense, soft-surfaced bale as he groped after Rosita and Esteban while Tio closed the door.

"Help me, Senor Morgan," said Pancho, guiding the American among the stacked bales. Together the two men shifted one of the thousand pound weights, creating a wool-strewn space on the floor where the four could make themselves comfortable. Morgan had hardly settled himself against the bales when Rosita uttered a faint exclamation of dismay. "Those papers!" she cried. "Those documents that will incriminate Uncle Miguel—we left them in Pancho's house."

"No, said Esteban. "I have them in my pockets. I picked them up from the table when I went for the whip." "Bueno," Morgan's eyes became enough accustomed to the darkness for him to see Tio Pancho nod his head in approval. "All we need to do now is remain out of sight until this hue and cry dies down. "I am afraid that will not be as soon as you imagine. "I have been here for some time, and I am sure that the police never abandon a hunt for murderers. We have merely postponed the inevitable."

"The police will never quit," acknowledged Tio. "But when Rojas does not find us in the Boca, the search will turn to the city. When the waterfront becomes quiet, perhaps in another night, I shall procure a motor-boat and we shall spirit you out of Argentina. It is only 30 miles across the Rio de la Plata to Uruguay. From that country you can find your way back to the United States."

"And you, amigo?" Morgan displayed no optimism at what seemed a reasonable prospect of escape. "What of yourself, Rosita and Esteban? To get me out of the country will not help you."

"Then we also shall go to Uruguay." "No," Morgan shook his head. "That is not the answer, Tio. We must stay here, fight Guillermo and prove, somehow, that he and his cohorts killed Velasquez and Diaz. We must prove that we are not the Evil One—he will not be satisfied to settle things so easily. He is not through yet. If you do not, he will in some manner accomplish what he set out to prove—that you and Col. Velasquez plotted to betray Argentina."

"Guillermo—Tio Pancho rubbing his beard-stubbled jaw, was frowning in concentration. "I have seen that tall man with the eye-glasses somewhere, and in the back of my head I recall that he was quiet, but gentle—a harmless old fellow."

"That would be a part of his act," said Morgan. "You would not expect him to go swagging through Buenos Aires in a Gestapo uniform if he is a spy, would you? Where have you seen Guillermo?"

"The details of his work," scowled Tio. "But it will come to me eventually, a quiet, smiling old man—yes, I have seen him many times."

"Perhaps you saw him years ago," Esteban said. "In an orchestra or on the concert stage. When I was

a boy Don Felix was a well-known musician." "Musician?" Tio Pancho's head lifted abruptly. "El Diablo!" he exclaimed, striking his fist against his forehead, at his own lack of perspicacity. "Of course! Music! That is it! That is where I have seen Guillermo—in the cafes and drinking places of the water front."

Morgan was conscious of a surge of interest. "You mean he plays his violin in the cafes?" "He does not make music," Tio explained with a shake of his head. "The sailors and stevedores make their own music and songs. Guillermo dropped in only to listen."

"There is a link somewhere. Perhaps Guillermo contacts the Nazi embassy which, having diplomatic immunity, can send uncensored cables to Berlin. The Wilhelmstrasse then gets in touch with the raiders and subs out in the Atlantic..."

But even as Morgan talked, he was aware of one great flaw in his argument. He had been unable to establish any connection between Guillermo the violinist and the raiders. He merely sits quietly at a table and sips a glass of wine while enjoying the entertainment.

For a while Morgan pondered in silence, dissatisfied with the explanations. "He must receive messages somehow. Unlike most agents, Guillermo uses no radio or telephone or written messages. He foresees the possibility that Argentina may one day join forces with the United States and is resolved not to be kicked out of Buenos Aires as other Nazi spies were expelled from Rio de Janeiro, Mexico City and similar places. If we could figure out how he operates—"

By this time the darkness of the warehouse was dissipating, an indication that the long night was nearing its end. Silently the three men and the girl watched the coming of the dawn. The rattle of a wagon on the street told that the city was beginning to stir.

Rosita stretched herself and rubbed her eyes. "I am sleepy," she murmured drowsily. "The men prepared a bed for her. Tio Pancho raked the scattered wool up to a pile and Morgan and Esteban folded her coats to make a pillow. When the girl had curled herself up Tio stretched out on the hard floor. "We may as well get some sleep also," he said. "It is one of the best ways I know of passing the time."

Pancho was snoring so quickly that Morgan almost fancied the sound of his snoring. He was snoring so loudly that he almost fancied the sound of his snoring. He was snoring so loudly that he almost fancied the sound of his snoring.

But every time he nodded, his drooping head would come up with a start, and presently the desire for slumber was gone altogether. The warehouse was lighted only through several glassless windows and in the half-twilight Morgan found himself gazing upon the sleeping Rosita, noting the perfection of her features, the darkness of her hair against her impromptu pillow, the lashes that framed a dusky semi-circle on her smooth cheek, the white teeth that gleamed between her slightly-part lips.

Morgan felt the muscles of his jaw tighten. This girl, refined and delicate, was sleeping where she could, like any out-and-out tramp, and there was no prospect that her condition would be bettered when the next night arrived. Was she like himself, destined to hide like a rat until he finally ran to earth by the police? Was there no way in which he could save her from that?

It was almost noon when Tio Pancho roused himself, spent a full minute yawning so audibly that he brought them all to a similar state of complete wakefulness. The stevedore then shuffled to a window from which he could survey the street below. "There is no sign of him," he announced, after that reconnaissance. "There is a store not far away. If you will remain quiet until I return I shall procure bread, sausages and a bottle of wine."

He stationed himself beside the

door, watched through a crevice for a lull in the waterfront traffic, then opened and closed the door quickly and was gone.

"Should we have let him go?" Morgan asked anxiously. "After all, he is a well-known figure in this neighborhood, and Guillermo will have informed Rojas that he is one of us."

"Pancho will be careful," Esteban said confidently, and Rosita smiled her belief in the ability of Tio Pancho to weather the dangers of what was a sortie into enemy territory. "He will be back before you realize he is gone, Senor Morgan."

The minutes passed, slowly as time does when one is forced to wait in silence and without activity. Morgan said nothing, but he was not inattentive to the cloud creeping over Rosita's face and the increasing frequency with which Esteban's eyes sought the door.

Finally the girl could contain herself no longer. "Esteban—what can be keeping Tio? It must be all of an hour since he left—"

"Be patient, Rosita," Esteban tried to be cheerful. "I know Tio is overdue, but let us hope for the best."

His absence did not mean that he had been arrested. The police may be in the vicinity, and Tio may be laying low until he is certain he can return to us without being detected or followed."

The girl attempted to assume the same mask of hope. But the minutes gnawed at it remorselessly, and another hour saw them silent and depressed, making no effort to disguise their mood. Esteban moved restlessly, making trip after trip to the unpaned window to peer up and down the street.

"Rojas must have captured Pancho," he admitted finally, seating himself despondently on the floor once more.

Another period of waiting ensued. The dim gloom of the warehouse's interior began to thicken; Pancho had been gone from noon until twilight. Again Esteban got to his feet. "I am going to attempt the trip to the store," he said.

(To Be Continued)

Next chapter—Esteban returns—but not alone.

Has Been Settled

New Road Through Canada Named Alaska Military Highway

Brig.-Gen. James A. O'Connor, of the U.S. army's northwest service command, settled once and for all the controversy surrounding the name of the Alaska highway by announcing the name "Alcan" had been abandoned and henceforth the 1,600-mile highway to the north will be officially known as "The Alaska Military Highway," the general said.

"By way of explanation, we called it the Alcan highway because we wanted to include in the name of the road some mention of our Canadian allies, on whose land much of the highway has been constructed," the general said.

"Yet Canadians themselves took the lead in urging us to name the road the Alaska highway."

"From members of parliament, from Canadian newspaper editors, from average citizens of Canada, I have received letters advocating that the road be simply named the Alaska Highway. Public opinion in both the United States and Canada seemed to be nearly unanimous in this respect," he said.

The change of name will involve a big repair job. The name "Alcan" painted on hundreds of trucks which ply up and down the highway, will now have to be re-done.

Flies Are A Menace

Early Action Is Now Urged To Ensure Effective Control

The season for flies—the common pestiferous, disease-carrying housefly—is upon us. Now at the very beginning of summer is the best time to destroy flies. Every fly killed now is as good as a million or more killed later on in the season. Calculators figure that the progeny of one pair of flies might equal five and a half billion by September if not interfered with in any way, and if breeding places were favourable.

A Universal Pest
All over the world wherever man has gone, too, Musca domestica, which is the scientific name for this universal pest, occurs always in association with the human family. There are other flies, notably the stable fly, and the bluebottle. They are relatives, but not the close associates of mankind that the common housefly is.

The common fly likes the food that mankind likes—meats, sweets, milk, cheese, bread, and practically everything that is eaten, cooked, or stored in the kitchen and the dining room in the house direct from the stable or the garbage dump. For that reason the common housefly should be as welcome as the common cold—less so in fact, for he carries the germs of diseases much more dangerous than the common cold. The disease-carrying capacity was not properly realized and understood until comparatively recent decades. And even now the menace of the pest is not always regarded as seriously as facts undoubtedly warrant. Fortunately, the prompt disposal of garbage and other refuse by the use of certain effective fly-killers such as fly pads are steps that anyone can take to protect the family against flies.

Humor In Holland

People Never Miss Chance To Poke Fun At Nazis

The Netherlands News says barbers in Holland are getting into the hair of the Nazis. According to a Dutch underground paper they are now charging five cents above the normal price to shave Nazis—"because their faces are longer these days." Customers co-operate in this barber shop inter-Nazi resistance. In the Hague a Dutch Storm Trooper of the Volunteer Home Guard and a loyal Hollander were waiting for a shave. When the barber asked "Who is next?" the loyalist replied with an ingratiating smile: "Well, I really am, but you had better attend to this gentleman first because the Allies may arrive any moment."

CHURCHILL'S OPINION
Prime Minister Winston Churchill listened to a discussion of recent books at a White House dinner, then said: "Too many books are being published these days. People should be content with the Bible and Shakespeare."

Palms trees provide food, shelter, clothing, timber, paper, starch, sugar and tannin.

Jedburgh is a border town with many interesting associations with Scott, Burns, Wordsworth—even Mary, Queen of Scots. And there is a fine old abbey founded by King David in 1147.

Mrs. Cruickshank's castle home is the old country prison and we went along with Capt. Frank Royal and saw some of the nice manacles they used to use for sheep stealers. The bell is the big attraction today and many a Scottish wife and mother would be glad to give Mrs. Cruickshank a hand when the time comes.

STORY BOOK BIRD

HE TALKS, Joan, just like birds in story books. Joan's mother promised her two goldfish if she got to school every day on time. "But that's easy!" says Joan. "Kumby always has my breakfast early because we have Kellogg's Corn Flakes at our house. She gives 'em to me after school, too. I love Kellogg's!" Yes, Kellogg's are ideal for old-hour snacks... ready in 30 seconds, leave no pots and pans to wash, easy to digest and economical. Get some tomorrow. Two convenient sizes. Made by Kellogg's in London, Canada.

Was Not Talking

How One General Got Out Of Answering Questions

Warnings about "careless talk" and people who try to extract military information from members of the forces may recall the story of one of Marlborough's generals who was being entertained at a big banquet in the City of London.

Next to him was a talkative alderman who insisted on boring him with a succession of questions about the life of a soldier in the field. The general fenced with him good-humoredly for a time, but the alderman would not be denied. "But, sir," he demanded, "surely yours must be a very laborious employment?" "Why, no, sir," rejoined the general, "we fight about four hours in the morning and two or three after dinner, and then we have all the rest of the day to ourselves."—Manchester Guardian.

Dr. E. V. Neely
Director, Agricultural Department
of the Test Line Elevator Association

The Country Fair

The wisdom of continuing agricultural exhibitions in wartime cannot be questioned so long as proper evaluation is placed on agricultural matters.

For several years, the exhibit of The North-West Line Elevator Association has been among the most popular features at B class fairs. We estimated that, in 1942, it attracted the attention of about 50,000 persons. It has always combined useful information with attractive appearance, and this year is no exception.

Food rationing has brought home to all of us the importance of agriculture in this war. Inefficiency in farm operations now means not only less to the farmer, but it actually hinders progress in defeating our enemies. This has been kept in mind in designing the exhibit.

Through the generous co-operation of the Entomological Branch of the Dominion Department of Agriculture, the exhibit includes a very interesting display concerned with various flies. Specimens of damaged leather, figures on actual losses and control methods are included, and a new bulletin will be distributed.

The central part of the exhibit portrays the movement of food from the farm to the fighting forces, and one wing is devoted to emergency rationing used in the army, navy and air force. Other features are weeds, soil erosion and 'sound' moving pictures.

We hope to welcome our readers at Swift Current (frontier celebration), Calgary, Regina, Yorkton, Melfort, Lloydminster, Vermilion, Vegreville, Red Deer, North Battleford and Prince Albert.

L. A. C. J. W. and Mrs. Wilson arrived here Tuesday night from Toronto. They will spend a short leave at the home of the former's parents, Mr. and Mrs. Wilson.

Mr. and Mrs. McFalls and son Jimmy of Hanna spent Sunday at the home of the latter's parents, Mr. and Mrs. Gilbertson.

Mr. and Mrs. R. D. Vanhook and daughter, returned on Sunday to their home at Lacombe.

Mr. H. F. Berry returned to his home here, after having spent about six weeks with his daughter at Lacombe.

We are pleased to be able to announce that the Chinook Athletic association has been fortunate in arranging with Mr. D. Miller of Alaska to have a Moving Picture Show each Tuesday at 8:30 p.m. in Chinook Agricultural Building.

The continuance of the Show will all depend on your patronage by your attendance.

R. A. Morrison
Secretary

FAREWELL PARTY HELD

Quite a large gathering met at the Hotel Ballroom after the Picture Show, in honor of another of our young men to throw in his lot with his Majesty's armed forces, Mr. Donald Nicholson.

We all know Don, and we know that he will measure up with the average in what ever duty he may be called upon to perform. We all sympathize with his mother, grandmother and other relatives, as we do for all parents who have loved ones in the service.

As Gen. Grant says, War is Hell, and we all agree on that phrase.

The party was sponsored by the young people. A large crowd accompanied him to the station.

Contributed

Donald Nicholson left on Tuesday night for Calgary where he will spend a few days before going to Toronto where he will receive Military training until the University opens when he will be given a year's training.

Seekers of Farm Prosperity

Western Canada will be gratified with the interest being shown in Parliament in the proposals which have been advocated since 1936 by the Line Elevator Companies for more intensive scientific research in developing industrial uses for farm products. The Line Elevator Companies have all along contended that greater farm prosperity would result from expanding markets through finding new uses for wheat and other farm products. In 1938 and 1939 a representative of the Line Companies visited the principal research laboratories of the United States and reported great possibilities for utilizing large quantities of wheat in the manufacture of alcohol and starches. This information was made available at that time to the Dominion Government and the Chemurgic Committee of the Canadian Chamber of Commerce. The weekly news papers of the Prairie provinces joined with the North-West Line Elevators Association in urging the Government to establish a Western division of the National Research Council and to erect plants for the manufacture of industrial alcohol from wheat. All beverage alcohol plants in Canada and the United States have since been converted to the use of wheat for the manufacture of industrial alcohol for war purposes. This year Canada will use 7,000,000 bushels of wheat in the manufacture of alcohol and proportionately larger quantities will be used in the United States.

Parliament a few days ago witnessed a unanimous demand from Liberal, Progressive-Conservative, C. C. F. and new Democracy members for the Government to appropriate \$500,000 this year to intensify scientific research for development of industrial uses for farm crops and thereby add to the prosperity of agriculture. Farm organizations, the governments of Saskatchewan and Alberta, the Pool Elevator Companies, Industrial Development Boards and various Boards of Trade in recent months have all added their voices to the need for action.

It is gratifying to the Weekly Newspapers to find consistent support which they have given the Line Elevator Companies proposals during the past five years is bringing about a united demand from all sections of the country for action by the Dominion Government. It is hoped that steps will be taken during the present session of Parliament to appropriate sufficient funds to establish a Western division of the National Research Council. This laboratory should be dedicated to bringing about greater farm prosperity through development of additional Western farm crops and new industrial uses for crops now being grown. The laboratory should also seek economic means of using wheat instead of petroleum in the manufacture of synthetic rubber.
